DETAILED ACTION

During a follow-up search, a new reference was uncovered: Lyons, 3601437. This reference along with the Hood reference makes applicant's claimed invention obvious to a person having ordinary skill in the art. The following is a detailed discussion on the application of these references on the claims.

Claim Rejections - 35 USC § 103

- 1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 2. Claims 26 and 30 have been rejected under 35 U.S.C. 103(a) as being unpatentable over Hood, 1847564 in view of Lyons, 3601437.

As to claim 26, Hood discloses, a storage cabinet comprising: a container having a floor, upright side walls and a rear wall attached to and extending upwardly from said floor, and a ceiling attached to said side walls and rear wall, said floor, side walls, rear wall, and ceiling defining a storage cavity; a vertical support member extending upwardly from said floor (1, front vertical panel in the center of the front portion of the cabinet as seen in figure 3); two doors (2), each pivotally attached to the cabinet on opposite sides of the support member, and each movable about respective pivot axes located on opposite sides of the support member between an open position, in which said cavity is accessible from a position forward thereof, and a closed position, in which said door contacts said support member and prevents access to said cavity from a

Art Unit: 3677

position forward thereof; and a latching mechanism (6) attached (7) to said support member (1), said latching mechanism including at least one release member (26) protruding forwardly from said support member, the at least one release member being movable from a latched position to an unlatched position (figure 2); wherein said doors may be transitioned from a latched condition, in which said latching mechanism latches said doors in the closed position in which the doors are in side by-side relationship, to an unlatched condition, in which said latching mechanism allows said doors to move to the open position, by moving the release members (26) from their latched position to their unlatched position.

Hood fails to disclose a single release member for actuating the two latches (14) simultaneously in order to open both doors at the same time. However, Lyons discloses in col. 4, lines 10-14 that the two latches (60) can be activated with a single pull handle.

It would have been obvious to a person having ordinary skill in the art to eliminate one of the two release members in Hood in order to simplify the manufacturing process and reduce the costs of producing the cabinet by eliminating all the elements associated with the second latching mechanism, as taught by Lyons.

Allowable Subject Matter

- 3. Claims 27-29 and 31-33 objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
- 4. The terminal disclaimer filed on 2/23/06 has been accepted and overcomes the double patenting rejection.

Art Unit: 3677

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jack W. Lavinder whose telephone number is 571-272-7119. The examiner can normally be reached on Mon-Friday, 9-4:00pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Judy Swann can be reached on 571-272-7075. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
